## HIGH PERFORMANCE

### LVC-105 Low VOC EnviroFIVE CLEARCOAT

#### OVERVIEW

PPG technology has been present at every major milestone in refinish development and is recognised for staying ahead of the stringent OEM requirements.

Today is no exception. PPG is proud to introduce LVC-105 EnviroFIVE CLEARCOAT, the fastest and best clearcoat on the market.

#### PRODUCT INFORMATION

PPG EnviroFIVE Clearcoat dries at a real 5 minutes at 60°C with outstanding final appearance and without any compromise on quality, ease of use or the size of repair.

Using the latest game-changing clearcoat technology, PPG has developed a unique product: a high speed drying clear with a winning combination of unparalleled finish appearance, hardness, excellent polishing properties, easy application and flow from the gun.

LVC-105 is clearly not just another fast clear! You get all these benefits whilst drying to a flawless mirror-like finish in just 5 minutes at 60 °C.

With PPG EnviroFIVE Clearcoat, you can be assured that 5 minutes drying time at 60 °C is the real deal, and where other clearcoats lose in quality at such a speed, you can rely on LCV-105 to deliver the exact same fantastic OEM clearcoat appearance every time in that very short time.

## FEATURES AND BENEFITS

FEATURE	BENEFIT
Dry in 5 mins @ 60°C, 20 mins @ 40°C and Air Dry in 90 mins	Significant energy savings and fast process times, increasing throughput in the bodyshop
Easy to apply and hard out the oven with a glossy mirror like finish	User-friendly, providing confidence in a high quality repair -first time
The same product can be used for any repair type, even for the largest areas.	Reduced stockholding (one clearcoat for all sized repairs)
Ideal clearcoat for Hybrid vehicles	Bodyshops cannot allow the batteries to get above 50°C. With only 5 minutes at 60°C LVC-105 becomes a good option.
Long pot life for a fast clear	Spot repair, panel repair and even full respray with no compromise on final appearance.
