

ENVIROBASE[®]

HIGH PERFORMANCE

LVC-136/5L Low VOC EN-V™ PERFORMANCE CLEARCOAT LVT-444/5L Low VOC CLEARCOAT ACCELERATOR THINNER

OVERVIEW

This briefing is to inform you of the introduction of a new Low VOC Clearcoat and Low VOC Accelerator Thinner to *Envirobase* range of products.

PRODUCT INFORMATION

Until now there has only been one option for Low VOC Clear in the *Envirobase* range. The introduction LVC-136 now gives the end user and alternative to LVC-104 EnviroFLOW.

En-V™ Performance Clearcoat is a premium Ultra High Solids polyurethane clearcoat specifically formulated for use as a premium re-spray clear over *ENVIROBASE* High Performance basecoat. However, when used in conjunction with LVT-444 Clearcoat Accelerator thinner, the single visit application mode and 15 minute bake time can be utilised to improve cycle time on smaller jobs.

FEATURES AND BENEFITS

- Uses same hardener as current LV Clear
- Excellent gloss retention and DOI
- Easier mixing with LVT-444 used 100% when accelerating, no 50/50 mixes
- LVT-444 can be used in both LVC-104 and LVC-136 100%
- No need to keep LVT-440
- Less prone to “Framing”
- Improved polishing
